

Attachment for the assignment

1

read pcap

```
from scapy.all import rdpcap
```

```
# Read the PCAP file
```

```
packets = rdpcap('ipp.pcap')
```

```
# Iterate through the packets
```

```
for packet in packets:
```

```
    print(packet.summary()) # Print a summary of each packet
```

```
    if packet.haslayer('IP'):
```

```
        print(packet['IP'].src, "->", packet['IP'].dst) # Print source and destination
```
